

TOCQUEVILLE BIODIVERSITY ISR I

MONTHLY FINANCIAL REPORT AS OF 31 MARCH 2025

Alvaro Ruiz-Navajas

Pierre Schang

Investment objective

The Fund's investment objective is twofold: - to seek to offer investors, over the recommended investment period of at least five years, a performance linked to a portfolio made up of shares of companies, with no restrictions in terms of geographical region, sector or capitalisation; - to pursue a sustainable investment objective by investing in the shares of virtuous companies meeting SRI criteria (environmental, social and governance) in sectors related to the biodiversity theme based on the analysis of the Delegated Investment Manager. In these sectors we find "Solutions" companies, which via their goods or services directly reduce the impact of human activities on biodiversity, or companies carrying out diversified activities with a high biodiversity footprint and which potentially could commit to reducing it.

	Historical max. drawdown	Beginning of the max. drawdown	End of the max. drawdown	Recovery delay (d)
Max. drawdown since inception	-14.54%	25/11/2022	23/10/2023	114

Volatility	Volatility measures the magnitude of an asset's price fluctuations and thus provides an estimate of its risk (mathematically, volatility is the standard deviation between the asset's returns).
Tracking error	This is the measure of the risk taken by the portfolio relative to its benchmark.
Sharpe ratio	The Sharpe ratio measures the difference between the portfolio's return and the risk-free rate divided by the portfolio's volatility.
Information ratio	This is the difference between the portfolio's return and the benchmark's return divided by tracking error.
Beta	The beta is the measure of the portfolio's sensitivity relative to its benchmark.

Monthly Comments

In March, Malaysia considered slowing down approvals for new data centre construction due to concerns about water use, and is now working on new water management guidelines to increase oversight of such construction. While the focus has been on electricity demand, it turns out that the growth in water use is outstripping the growth in electricity demand. So we see water as the next key regulatory issue for this industry, even if it hasn't yet figured prominently in the discussions. We consider that water remains the most important resource, and whatever the political direction of decision-makers, its treatment and conservation will remain an important area of investment for the future. Tocqueville Biodiversity SRI invests in companies such as Xylem and Zurn Elkay Water Systems, which are at the heart of investment in water treatment technologies.

Tocqueville Biodiversity SRI outperformed its performance indicator in March, driven by its positioning in Materials and Services to Communities. The main relative positive contributors over the period were Veolia (+10.4%), SABESP (+6.2%), Vinci (+4.7%) and the absence of Apple (-11.7%). Conversely, the biggest relative negative contributions came from Xylem (-12.2%), Ecolab (-9.4%), Ebara (-12.3%) and Eli Lilly (-13.7%).

In March, we added to Vinci and introduced Thermo Fisher Scientific, while reducing Ingersoll Rand and GEA Group.

TOCQUEVILLE BIODIVERSITY ISR I

MONTHLY ESG REPORT AS OF 31 MARCH 2025

GREaT PROFILE OF THE PORTFOLIO

ESG approach	Selectivity ¹
Selectivity rate ²	25%
Portfolio's lowest GREaT score ³	6.08
Pivotal GREaT score ⁴	5.36

The GREaT score is based on an ESG analysis methodology proprietary to the LBP AM Group. The GREaT score scale ranges from 1 to 10, with 10 representing the highest ESG quality of an issuer.

¹ The ESG 'selectivity' approach excludes from the comparison universe a percentage of issuers - corresponding to the selectivity rate - present on the exclusion lists applicable to the portfolio and/or those with the lowest ratings.

² The selectivity rate is the percentage of the comparison universe excluded for ESG reasons.

³ The lowest GREaT score in the portfolio must be higher than the pivotal GREaT score.

⁴ The pivotal GREaT score is the score of the last issuer excluded from the comparison universe after removing a percentage of issuers corresponding to the selectivity rate. The portfolio can then invest in any issuer whose GREaT score is higher than the portfolio's pivotal GREaT score.

ESG: Environmental, Social and Governance criteria

To find out more about the composition of the comparison universe, please consult the fund prospectus.

GREaT METHODOLOGY

Responsible governance

Encourage the dissemination of best practices in terms of corporate governance and business ethics.

Sustainable Resource Management

Sustainable management of human and natural resources: respect for human rights, development of labour laws, sustainable relations with suppliers, environmental protection.

Energy Transition

Mitigating climate risks by supporting the transition from a high-carbon economic model to a more sober and sustainable model.

Territorial Development

Promote responsible practices that meet the Sustainable Development Goals and create value for all stakeholders in the value chain.

	Portfolio	Portfolio coverage	Comparable	Comparable coverage	Type of comparable

TOCQUEVILLE BIODIVERSITY ISR I

MONTHLY ESG REPORT AS OF 31 MARCH 2025

PORTFOLIO SUSTAINABILITY INDICATORS

	Portfolio	Minimum commitment
Percentage of Sustainable Investment	88.1%	80.0%

According to the European SFDR (Sustainable Finance Disclosure Regulation), sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices. The percentage of sustainable investment presented here is based on the LBP AM Group's proprietary methodology, available in full on our website: <https://www.lbpam.com/fr/publications/methodologie-investissements-durables>

Indicator 1 - Environment	Portfolio	Comparable
Net Zero Alignment	64.4%	46.8%
Coverage rate	100.0%	100.0%

Indicator 2 - Environment	Portfolio	Comparable
Biodiversity footprint - GBS	65.8	94.1
Coverage rate	95.9%	84.2%

HISTORICAL PERFORMANCE OF INDICATOR 1

HISTORICAL PERFORMANCE OF INDICATOR 2

Indicator 1 methodology

Indicator name and source	Definition	Unit of measure
Net Zero trajectory Source(s) : CDP_TEMP	Share of companies whose greenhouse gas emission reduction targets are validated by SBTi.	%

Indicator 2 methodology

Indicator name and source	Definition	Unit of measure
Biodiversity footprint - GBS Source(s) : CDC_BIO	GBS: Global Biodiversity Score - estimate of a company's impact on biodiversity, taking into account its historical activity, related to land artificialisation, overexploitation of resources, pollution and climate change. The higher the score, the greater the company's impact on biodiversity.	MSA.ppb*/b€ invested

For more information on the methodologies used to calculate sustainability indicators and on our approach as a responsible investor, please refer to the documents available on our website at <https://www.lbpam.com/fr/publications/methodologie-investissements-durables>

The French State's SRI label is valid for a limited period and is subject to reassessment. Furthermore, the fact that a UCI has been awarded the label does not mean that it meets your own sustainability objectives, or that the label meets the requirements of future national or European regulations.

PORTFOLIO'S NON-FINANCIAL OBJECTIVE

The financial product's SRI management approach consists of identifying companies with the best sustainable development practices, according to the management company's analysis.

This analysis is based on the GREaT philosophy, specific to the management company, articulated around the following four pillars:

- Responsible governance: this pillar aims to assess the organisation and effectiveness of powers within issuers (balance of power, executive remuneration, business ethics).
- Sustainable management of resources: this pillar looks at the environmental impact and the management of the human capital of issuers (quality of working conditions and management of relations with suppliers).
- Economic and energy transition: this pillar assesses the issuer's strategy in favour of energy transition (greenhouse gas reduction and response to long-term challenges).
- Regional development: this pillar analyses the issuer's strategy in terms of access to basic services.

Several criteria are identified for each pillar and monitored using indicators collected from non-financial rating agencies (MSCI ESG Research, Moody's ESG and Ethifinance Ratings).

The methodology used reduces bias, particularly capital and sector bias.

Ultimately, the management company is the sole judge of an issuer's non-financial quality, which is expressed:

- According to a GREaT score between 1 and 10 - 10 representing the best ESG quality of an issuer.

In addition, the management company applies sectoral and normative exclusions designed to limit investment in issuers with excessive adverse impacts. Our sector exclusion lists include certain issuers from controversial sectors such as tobacco, gambling, coal, oil and gas, according to criteria defined by the management company. Our normative exclusion list is based on analyses of ESG controversies or allegations and identifies cases of severe, systematic and uncorrected violations of ESG rights or infringements. In addition to the management company's common exclusion base, portfolios that hold the French government's SRI label comply with the mandatory exclusions listed in its guidelines.
